## Software Engineer

## ABOUT

A driven and dedicated software engineer with a passion for creating engaging user experiences. Skilled in designing and developing modern, visually appealing interfaces with dynamic animations. Proven ability to work effectively in both client-side and server-side development roles. Comfortable and adaptable to various technology stacks.

## GOALS

As an experienced software engineer with internship-level experience in team-based development, I am seeking new challenges and opportunities to expand my skillset. I am eager to work on large-scale projects and be part of a team that is pushing boundaries and creating innovative solutions in different industries.

## PROJECTS

### The Archive

Jan 2022 - Feb 2022

#### Paid project

Developed an elegant showcase website for luxury fashion brand with smooth transitions, Firebase backend for product sorting and filtering by brand and category, and pagination for optimized performance.

Vue.js Vite TypeScript Firestore FirebaseStorage

### Blockchain Visual

Dec 2021 - Jan 2022

#### Side project

A visualisations website for blockchain.

Vue.js Vite TypeScript

## WORK EXPERIENCE

### Agoda

#### Part-time Internship

Dec 2022 - Present

#### Cooperative Education

Aug 2022 - Nov 2022

Worked on "Agoda Homes" product

#### Pricing page - property creation sites:

- Modify to add input for weekly and monthly promotions
- Create service to apply promotions and endpoint to get default values
- Create dashboard to monitor metrics and host participation
- An increase in host participation for long stay promotions and customer utilization

#### Profile page - property creation sites:

- Implement logic to show/hide profile pages and process profile information
- Create dashboard to show metrics such as skipped profile pages

#### Booking notification services:

- Implement scheduler job to send reminder emails to hosts
- Implement database to store BOR requests used by scheduler to determine which booking requests haven't expired before sending reminder messages
- Create dashboard to show metrics such as successful/failed reminder emails sent and number of BOR requests in database
- Create dashboard to showcase business data such as the number of BOR requests that have expired and the open rate of the email notification sent
